Double Surgeon's Loop

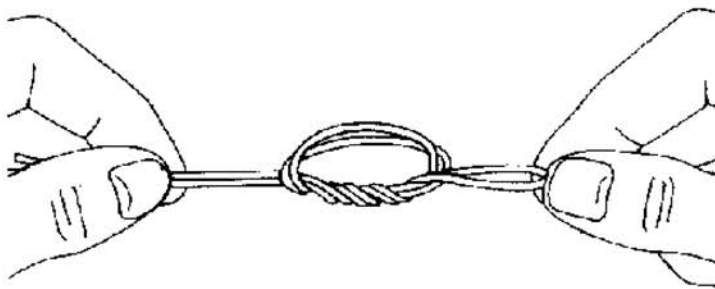

Use to tie loops in end of leader and tippet for a loop to loop connection
a.k.a. Hand Shake

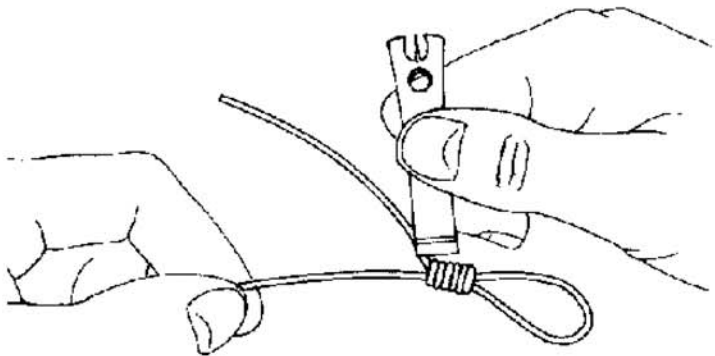

Step One: Form a loop in the end of your leader.

Step Two: Make a simple overhand knot in the double line.

Step Three: Then bring the loop end through the overhand knot again. Lubricate and tighten by pulling on the loop end with one hand and the standing leader and tag end in the other.

Step Four: Once tied clip off the excess line of the knot.
